

FIG. 2

A scatter plot showing the relationship between 'gas cut actual at B' (x-axis) and 'gas cut measured' (y-axis). Both axes range from 0 to 1. A solid diagonal line represents the ideal 1:1 relationship. Five data points are plotted, all of which are very close to this line, indicating high measurement accuracy. The points are clustered in the lower-left region, specifically between 0.2 and 0.3 on both axes.
